

SIVABHARATHI.M
Python Fullstack Developer

7708720347 ||sivabharathi1166@gmail.com || www.linkedin.com/in/sivabharathi08 || github.com/sivabharathi1166

SUMMARY

Skilled in Django, MySQL, React, and frontend technologies. Developed e-commerce and expense tracker projects with user authentication. Completed a Python Full-Stack course and built various Python-based applications. Seeking a role to apply web development expertise.

SKILLS

- **Backend** : Python,Django
- **Frontend** : HTML,CSS,Bootstrap,Javascript,React
- **Database** : Mysql,SQL
- **Version control** : Git,Github
- **Deployment** : Vercel,Render,Netlify
- **Tools** : Ms word,powerpoint,Excel
- **Others** : REST APIs, Authentication & Authorization, Responsive Web Design

EXPERIENCE

- **Internship in python** **- IDM Techpark ,Erode 2024**
Completed a 60-days Python development internship, gaining expertise in Python programming and Object-Oriented Programming (OOP) Concepts, including encapsulation, inheritance, polymorphism, and abstraction. Worked on developing efficient algorithms, and optimizing performance for real-world applications.
- **Python Fullstack developer** **- IDM Techpark, Erode 2025**
Completed a Python Full-Stack course, gaining expertise in both frontend and backend development. Developed an e-commerce web project, applying skills in Django, MySQL, React, and REST APIs to build a fully functional and responsive application.

EDUCATION

- **B.sc** -Biotechnology – Nandha arts and science college, Erode **85%**
- **HSC** - The Richmond matric School, Perundurai **84%**

PROJECTS

- **Cake website using Django and python :**
Developed a cake ordering website using Django and MySQL, featuring user authentication, a product catalog, and order management. Implemented a dynamic admin panel for managing products and orders efficiently. Integrated a responsive UI with Bootstrap for an enhanced user experience. Added search and filter functionality to improve product discovery.
- **Weather App using React:**
Developed a weather application using React.js, fetching real-time data from the OpenWeatherMap API. Added features like temperature, humidity, wind speed, and weather condition display.
- **E- commerce website using Fontend Technologies:**
Designed and developed a responsive furniture website using HTML, CSS, JS and Bootstrap. Implemented an intuitive UI with a clean layout for product display. Focused on responsiveness

CERTIFICATIONS

- 1.Python fullstack developer Certification.
- 2.Digital training in MS 365 Cybersecurity,Ms word,Excel,Powerpoint course Advance Level by Microsoft offering courses certification.
